Content and Study Plan

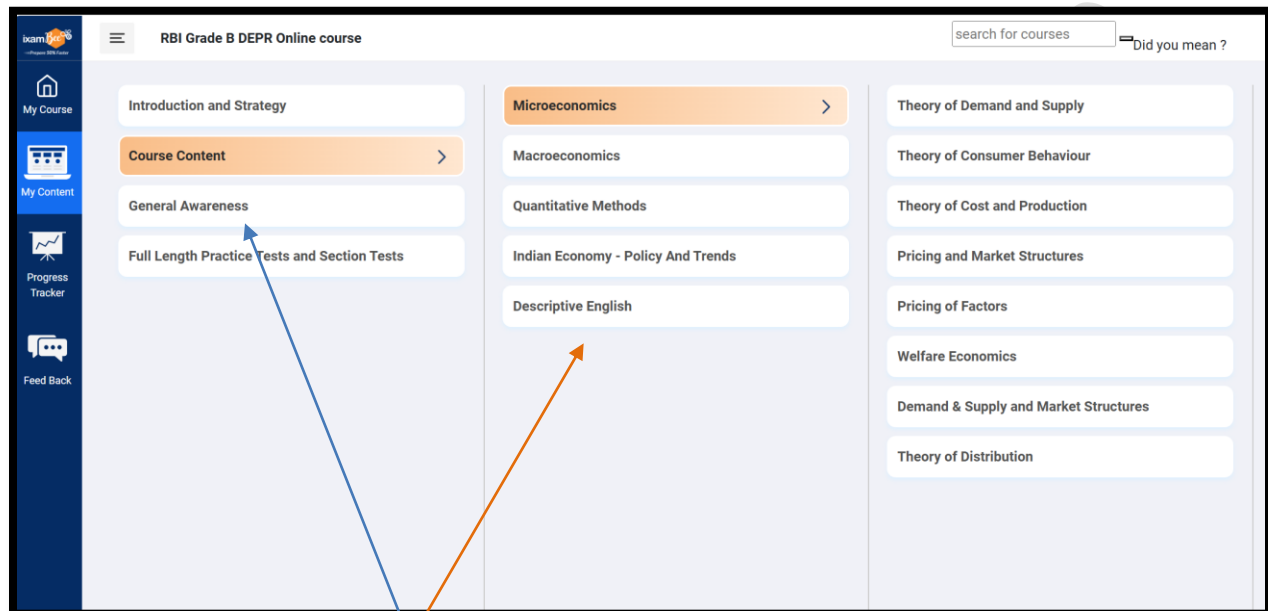

**RBI GRADE B (DEPR)-
2024**

www.ixamBee.com

Introduction

For your preparation of DEPR 2024, the ixamBee course presents content, as per the syllabus through a mix of recorded videos, downloadable PDF notes and lots of practice questions.

The course content is presented under the four modules (as per syllabus), focusing on the most important aspects from the point of view of the exam. These are relevant for both the Phase 1 and Phase 2 preparation.

Note -

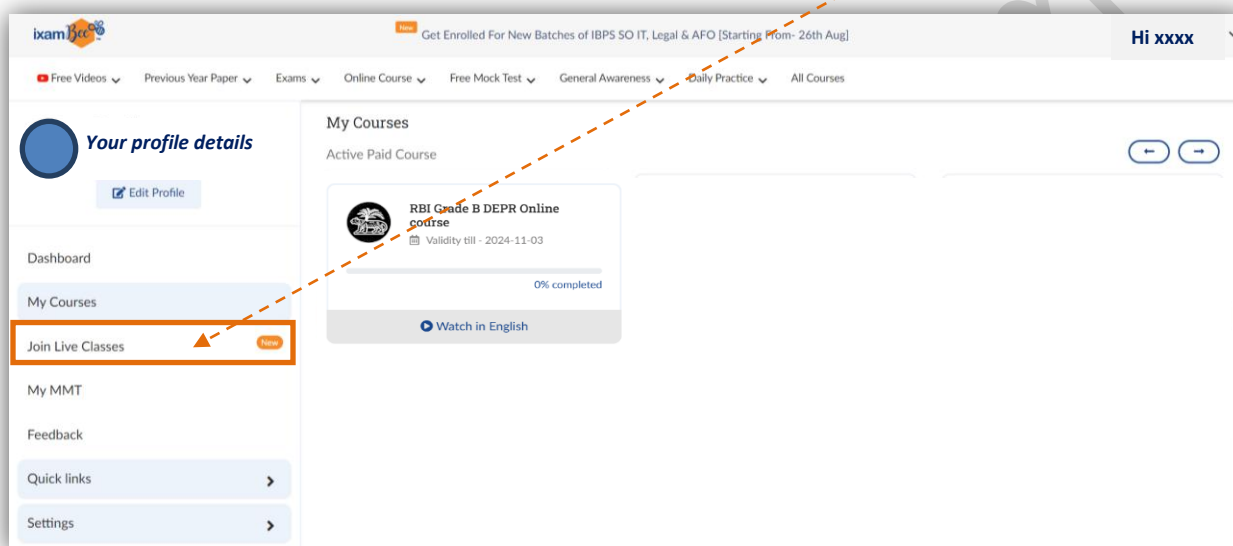

In addition to the Economics content, the course also provides content for current developments (Part of Phase 1 syllabus) under **General Awareness** that covers important updates on a daily basis (through Beepedia) and other economic updates under Economic and banking and finance current affairs. Summaries and MCQs of important reports like Union Budget, Economic Survey and RBI Reports are also provided here.

Descriptive English (Paper 2 under Phase 1) is also covered through videos, practice tests for your complete preparation of the exam. A **weekly live class** is also conducted by **Dr Sanjiv Sharma, ex-CGM, RBI** and a PhD holder in English from IIT Kanpur, for this paper.

Please explore the course to get maximum benefit out of it.

Economics – Content and study Plan

- In addition to the existing content, our Economics faculty, **Sahil Arora Sir**, will be providing, value added content (videos and PDF, as relevant to the topic) as per the following schedule. This will get added in the existing content as per the topics. The plan of content addition is presented in the table below.
- Sahil Sir will also hold a **live interactive class on Thursday at 9 pm**. The link to join the class can be accessed from your dashboard:

- These **live classes are to complement the crisp content** available in the course and address any doubts you may have related to the topic of that week.

Weekly content addition plan by Sahil Sir:

| Subject | Topic | Week |
|----------------|--|--------------|
| Microeconomics | Consumer Behavior <ol style="list-style-type: none"> 1. Utility functions: (8 different types) – also include: <ol style="list-style-type: none"> a. Marshallian Demand Functions b. Price, Income and cross price elasticity 2. Indirect utility functions 3. Expenditure functions 4. Hicks Demand function 5. Slutsky Equation- Also include Compensated demand 6. Price effect. | July-Week -3 |
| Microeconomics | Production and Cost <ol style="list-style-type: none"> 1. Production <ol style="list-style-type: none"> a. Relation between TPP, AP and MP (Both graphically and numerically) | July-Week -4 |

| Subject | Topic | Week |
|----------------|---|--------------------|
| | b. Production functions (Isoquants): 4 types c. Elasticity of substitution d. Returns to factor and returns to scale 2. Cost a. Relation between different costs (graphically and numerically) b. Input demand functions (Maximization of output given cost and minimization of cost given output) Production function to cost function and cost function to production function. | |
| Microeconomics | Markets and Exchange (Welfare) Markets 1. Perfect competition- a. Supply curve b. Numerical 2. Monopoly – a. Does monopoly have a supply curve? b. Lerner index of monopoly power. c. Consumer, producer, and social surplus (comparison between perfect competition and Monopoly) d. Numerical – Market structures Exchange(Welfare) | July-Week 5 |
