Reasoning & Data Analysis & Numerical Ability

Direction:- Study the information carefully and answer the questions:

Seven friends – P, Q, R, S, T, U and V – bought cars in different months of the same year – March, April, June, August, September, October and December. Each of them bought a car in different city – Delhi, Agra, Dehradun, Chandigarh, Surat, Indore and Lucknow.

P bought a car in a month having 30 days, but not in April. Only two people bought a car between P and the one who bought a car in Agra. P did not buy a car in Dehradun. S bought a car in a month immediately before the one who bought a car in Agra.

The number of people who bought car between U and the one who bought a car in Dehradun is one more than that between P and the one who bought a car in October. U bought a car in one of the month before the one who bought a car in Dehradun. The car in Dehradun was not bought in October. The car in Lucknow was bought in a month having 30 days but not in June. Only three people bought cars between Q and the one who bought in Lucknow.

More than three people bought cars between R and V. R bought a car before V. No one bought a car between T and the one who bought in Delhi. The car in Chandigarh was bought in one of the months before T. V did not buy a car in Indore.

1. Which person bought the car in December month?

- 1) U
- 2) T
- 3) R
- 4) V
- 5) S

Ans- 4

2. In which of the following month the one who purchased the car in Indore had?

- 1) June
- 2) December
- 3) October
- 4) August
- 5) April

Ans- 4

3. Which of the following statement is not true?

- 1) V purchased car in Surat.
- 2) Q purchased car in October.
- 3) P didn't purchased car in Lucknow.
- 4) R is not the first one to purchase the car.
- 5) S purchased car in September in Indore.

Ans- 5

4. Who purchased the car just after S purchased?

- 1) Person Q
- 2) Person U
- 3) Person P
- 4) Person T
- 5) Person V

Ans- 1

Direction:- Study the following information carefully to answer the given questions:

There are six employees P, Q, R, S, T and U of a company and all of them are working on six different designations of a company viz. BOD, CLO, CFO, CTO, Manager and Clerk. All the designations given are to be considered in a given order (as BOD is considered as Senior-most and Clerk is considered as the Junior-most). The one who likes Guava is junior than Q. S does not like Guava and Mango. One of the persons likes Orange. T is just junior to the one who likes Mango. Only two persons are junior to S. The one who likes Grapes is junior to only one person. P likes Pear and is Senior to Q. T is senior to U. Q does not like Banana. P is not Manager. Q does not like Grapes .

5. Who is just junior to Q?

- 1) S
- 2) P
- 3) Q
- 4) U
- 5) None of these

Ans- 4

6. Who among the following is Manager of the company?

- 1) S
- 2) Q
- 3) T
- 4) P
- 5) None of these

Ans- 2

7. S likes which of the following fruits?

- 1) Banana
- 2) Orange
- 3) Guava
- 4) Grapes
- 5) None of these

Ans- 1

8. How many pairs of letters are there in the word "REFERENCE" each of which have as many letters between them in the word as they have between them in the English alphabetical series?

- 1) Two
- 2) Three
- 3) One
- 4) More than three
- 5) None

Ans- 2

Direction:- Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

9. **Statements:**

Only capture are moment

Only few capture are pictures

All pictures are pixel

Conclusion:

- I. All capture can never be pixel
- II. Some pictures can be moment

FCI AGM General Admin 2021 Previous Year Paper

- 1) If only conclusion I follows.
- 2) If only conclusion II follows.
- 3) If either conclusion I or II follows.
- 4) If neither conclusion I nor II follows
- 5) If both conclusions I and II follow

Ans- 1

Direction:- In each of the questions given below some statements are followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

10. Statements:

Some plates are saucers

All saucers are spoon

Only few cups are plates.

Conclusions:

- I. Some plates are spoons
- II. Some spoons are cups
- III. No cup is saucer

- 1) Only II is true
- 2) Only I is true
- 3) Only III is true
- 4) Both I and III is true
- 5) None of these

Ans- 2

11. All nutrients are protein.

Only few nutrients are carbohydrates.

No calcium is nutrient.

Conclusions:

- I. Some calcium being protein is a possibility.
- II. All protein being carbohydrate is a possibility.
- III. No carbohydrate is protein.

- 1) Only I is true
- 2) Both I and II is true
- 3) Only II is true
- 4) Both II and III is true
- 5) None of these

Ans- 1

12. In the word "SCIENCE" all consonants are written as their preceding letter and all vowels are written as their following letters. Now all letters are arranged in alphabetical order from left to right and all the repeated letters are eliminated. Then, how many such pairs of letters are there, each of which have as many letters between them in the word (in both forward and backward direction) as they have between them in the English alphabetical series?

- 1) Four
- 2) Two
- 3) Three
- 4) One
- 5) None

Ans- 5

Direction:- Study the following information carefully and answer the questions below:

In a family of some persons Devender says that Manya is the daughter of my sister Srishti, who is the only daughter of Rakesh. Akash is the child of Rakesh and Ileana, who is the grandmother of Suneha. Sarika is the mother of Bhavya, who is the only sister of Suneha. Akash is unmarried.
