Q.37 Study the given data and answer the question that follows.

The tables shows the number of candidates (in lakh) appearing in an entrance exam from four different cities and the ratio of candidates passing and failing in the same.

City	Α	В	С	D
Number of candidates	2.15	1.14	1.56	2.35

Ratio of candidates passing and failing within the city.

City	Passing	Failing
Α	4	2
В	5	3
С	6	4
D	4	6

What is the number of failed candidates (in lakh) in city D?

Ans 🗙 1. 1.70

🗙 2. 1.25

🗙 3. 1.85

🖋 4. 1.41

## Comprehension:

Read the given passage and answer the question that follows.

We started our research into organisational and personal excellence by studying a slightly different topic. We figured that if we could learn why certain people were more effective than others, then we could learn exactly what they did, clone it and pass it on to others. We asked people to identify who they thought were their most effective colleagues. In fact, over the past twenty-five years, we have asked over twenty thousand people to identify the individuals in their organisations who could really get things done. We wanted to find those who were not just influential but who were far more influential than the rest.

### SubQuestion No: 46

### Q.46 Which real life situation can be the most appropriate to be inferred from the passage?

Ans X 1. Inflation has direct influence on the morals and ethics of an individual.

 $\mathbf{X}$  2. If we do something wrong to decent people, the same comes to haunt us even after many years.

 $\mathbf{X}$  3. People nowadays do not have patience and want quick success and does not matter what path they choose to obtain their targets.

4. Jassie is an efficient employee whose work ethics can be a case study to learn more about organisational and personal excellence.

## Q.27 Study the given table and answer the question that follows.

The table shows the number of students doing various courses in various cities.

City	MBA	MCA	M.Sc.	M.Com.	M.A.	Total
Ahmedabad	1234	1384	1440	1289	1332	6679
Bengaluru	1156	1783	1874	1003	1340	7156
Bhopal	1187	1347	1532	1321	1486	6873
Chennai	1342	1473	1129	1765	1666	7375
New Delhi	1230	1098	1128	1865	1777	7098
Hyderabad	1456	1234	1556	1653	1789	7688
Kolkata	1239	1785	1865	1504	1762	8155

In Chennai, the number of students in MBA is nearly what percentage of students in M.A? (rounded off to 2 digits after decimal)

Ans 🗙 1. 76.25%

🖋 2. 80.55%

🗙 3. 92.12%

🗙 4. 99.23%

Read the given passage carefully and answer the questions that follow.

Throughout history, the intricacies of the human mind have been the subject of fascination and inquiry. From ancient philosophers to modern-day neuroscientists, the workings of the brain have been studied and analysed in an attempt to unravel its mysteries. However, despite centuries of research, much remains unknown about the complexities of human cognition and consciousness.

One of the most fascinating aspects of the human mind is its ability to create and imagine. The human mind has the capacity to conceptualise and bring into being ideas that were previously unknown or unimaginable, from artistic expression to scientific discovery. The process of creativity has captured the attention of scholars and laypeople alike and is both enigmatic and awe-inspiring.

There have been many theories proposed to explain the process of creativity. Some suggest that it is a purely subconscious process, while others argue that creativity is a result of conscious effort and intentional problem-solving. Still others suggest that creativity arises from a combination of conscious and subconscious processes.

Despite the ongoing debate over the nature of creativity, one thing is clear: it is a multifaceted and complex phenomenon. Creativity can manifest in a wide range of human activities, from the creation of art and literature to the development of scientific theories and inventions. It can occur in both individual and collective contexts and can be driven by a variety of factors such as curiosity, passion, or the desire for recognition.

Creativity also has the potential to bring about positive change in the world. Throughout history, creative individuals and groups have used their talents to address social, political, and environmental challenges, often inspiring others to take action and make a difference. From the abolitionist movement to the civil rights movement to the environmental movement, creativity has played a crucial role in promoting social justice and positive change. Despite the many benefits of creativity, it is not without its challenges. The process of creative

Despite the many benefits of creativity, it is not without its challenges. The process of creative expression can be fraught with obstacles, from self-doubt and insecurity to external pressures and constraints. Moreover, not all creative ideas are successful or well-received, and many artists and innovators face rejection and criticism as they seek to bring their ideas to fruition. Despite these challenges, however, the human drive to create and imagine persists. Individuals and groups continue to harness the power of creativity to make a difference in the world. From the humblest amateur artist to the most celebrated innovator, the human capacity for creativity remains one of our greatest strengths and sources of inspiration.

# SubQuestion No: 46

	In this question, three statements are given, followed by two cond and II. Assuming the statements to be true, even if they seem to b commonly known facts, decide which of the conclusions logically the statements. Statements: I. No dean is a teacher.	e at variance with
	II. All teachers are professors.	
	III. No professor is a lecturer.	
	Conclusions: I. Some deans are lecturers.	
	II. Some teachers are lecturers.	
IS	X 1. Only conclusion II follows	
	X 2. Only conclusion I follows	
	X 3. Both conclusions I and II follow	
	✓ 4. Neither conclusion I nor II follows

Q.46	Study the	given	table	and	answer	the	question	that	follo	ws
------	-----------	-------	-------	-----	--------	-----	----------	------	-------	----

The table shows the number of pages printed by four printers in three days.

Days	Printers			
	Α	В	С	D
Friday	350	451	412	206
Saturday	420	325	365	251
Sunday	238	198	258	326

What is the respective ratio between total number of pages printed by printer D on Friday and Sunday together and total number of pages printed by printer A on Friday and Saturday together?

💉 2. 38 : 55

🗙 3. 51 : 34

🗙 4. 55 : 38

#### Comprehension:

Read the given passage and answer the questions that follow.

Climate policy must now put health at the centre and promote climate change mitigation policies that bring health benefits simultaneously. Health-focused climate policy would help bring about a planet that has cleaner air, more abundant and safer freshwater and food, more effective and fairer health and social protection systems and, as a result, healthier people. Investment in clean energy will yield health gains that repay those investments twice over. There are proven interventions able to reduce emissions of short-lived climate pollutants, for instance applying higher standards for vehicle emissions, which have been calculated to save approximately 2.4 million lives per year, through improved air quality and reduce global warming by about 0.5°C by 2050. The cost of renewable sources of energy has decreased significantly in the last few years, and solar energy is now cheaper than coal or gas in most major economies.

### SubQuestion No: 46

Q.46 What is the ANTONYM for the word 'intervention', from the passage?

- Ans 🛛 🗙 1. Specific
  - X 2. Evidence
  - 3. Non-involvement
  - 🗙 4. Data

Read the given passage carefully and answer the questions that follow.

As a society, we have come a long way in terms of progress and development. We have eradicated diseases, explored space, and created technological wonders that were once thought impossible. Yet, there is still one issue that continues to plague us: stupidity. Yes, stupidity. The thing that seems to be contagious and has been spreading faster than the common cold. It's everywhere you look - on social media, in politics, in the workplace. You can't escape it.

It's as if we've all collectively decided that intelligence and common sense are no longer important. Why bother using your brain when you can just rely on your gut feelings and conspiracy theories?

Take politics, for example. It used to be that politicians were expected to be knowledgeable and well-informed about the issues they were dealing with. Now, it seems that all you need is a catchy slogan and some empty promises to win an election.

And don't even get me started on social media. It's a breeding ground for stupidity. People will believe anything they read as long as it confirms their preconceived biases. And don't even think about trying to present them with actual facts and evidence. That's just a waste of time. But it's not just individuals who are to blame for this epidemic of stupidity. Our education system is failing us as well. We're teaching our kids how to pass tests instead of how to think critically and solve problems. It's no wonder we have a generation of adults who can't even find their way around a basic math problem.

Of course, there are some who would argue that stupidity is just a different way of thinking. That it's a valid perspective that deserves to be respected. To those people, I say this: if you want to be stupid, go ahead. Just don't expect the rest of us to respect your opinions when they're based on nothing but ignorance and misinformation.

It's time for us to take a stand against stupidity. We need to start valuing intelligence and critical thinking again. We need to hold our leaders accountable for their actions and demand that they be knowledgeable and well-informed. We need to teach our children how to think, not just how to memorise.

It won't be easy, but it's a fight worth fighting. Because if we don't, we'll be stuck in a world where stupidity reigns supreme, and there's no telling what kind of damage that could do. So let's all do our part and start using our brains again. It's time to put an end to the epidemic of stupidity once and for all.

## SubQuestion No: 46

Q.46 Which of the following techniques has been used by the author of the passage to convey the message?

## Ans X 1. Examples and anecdotes

X 2. Factual and chronological account

And don't even think about trying to present them with actual facts and evidence. That's just a waste of time. But it's not just individuals who are to blame for this epidemic of stupidity. Our education system is failing us as well. We're teaching our kids how to pass tests instead of how to think critically and solve problems. It's no wonder we have a generation of adults who can't even find their way around a basic math problem.

Of course, there are some who would argue that stupidity is just a different way of thinking. That it's a valid perspective that deserves to be respected. To those people, I say this: if you want to be stupid, go ahead. Just don't expect the rest of us to respect your opinions when they're based on nothing but ignorance and misinformation.

It's time for us to take a stand against stupidity. We need to start valuing intelligence and critical thinking again. We need to hold our leaders accountable for their actions and demand that they be knowledgeable and well-informed. We need to teach our children how to think, not just how to memorise.

It won't be easy, but it's a fight worth fighting. Because if we don't, we'll be stuck in a world where stupidity reigns supreme, and there's no telling what kind of damage that could do. So let's all do our part and start using our brains again. It's time to put an end to the epidemic of stupidity once and for all.

## SubQuestion No: 48

Q.48 What is the tone of the passage?

- Ans < 1. Sarcastic
  - 🗙 2. Serious
  - 🗙 3. Melancholic
  - 🗙 4. Joyful

Question ID : 264330165139 Option 1 ID : 264330647660 Option 2 ID : 264330647661 Option 3 ID : 264330647662 Option 4 ID : 264330647659 Status : Answered Chosen Option : 3

Read the given passage carefully and answer the questions that follow.

As a society, we have come a long way in terms of progress and development. We have eradicated diseases, explored space, and created technological wonders that were once thought impossible. Yet, there is still one issue that continues to plague us: stupidity. Yes, stupidity. The thing that seems to be contagious and has been spreading faster than the common cold. It's everywhere you look - on social media, in politics, in the workplace. You can't escape it.

It's as if we've all collectively decided that intelligence and common sense are no longer important. Why bother using your brain when you can just rely on your gut feelings and conspiracy theories?

Take politics, for example. It used to be that politicians were expected to be knowledgeable and well-informed about the issues they were dealing with. Now, it seems that all you need is a catchy slogan and some empty promises to win an election.

And don't even get me started on social media. It's a breeding ground for stupidity. People will believe anything they read as long as it confirms their preconceived biases. And don't even think about trying to present them with actual facts and evidence. That's just a waste of time. But it's not just individuals who are to blame for this epidemic of stupidity. Our education system is failing us as well. We're teaching our kids how to pass tests instead of how to think critically and solve problems. It's no wonder we have a generation of adults who can't even find their way around a basic math problem.

Of course, there are some who would argue that stupidity is just a different way of thinking. That it's a valid perspective that deserves to be respected. In the following passage some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

Among the largest species of cats in the world, tigers are powerful hunters with (1)\_\_\_\_\_\_ teeth, strong jaws and agile bodies. They range across Asia from Russia all the way to Sumatra and mainland Southeast Asia. Researchers still have much to learn (2) \_\_\_\_\_\_ these beautiful, endangered (3) \_\_\_\_\_.

There is currently one recognized species of tiger, Panthera tigris. Scientists have further (4) \_\_\_\_\_\_ the tiger into nine subspecies: the extinct Bali, Caspian and Javan subspecies, and the living Malayan, Sumatran, South China, Indochinese, Bengal and Amur (or Siberian) subspecies. Of these six subspecies, AZA-accredited zoos currently manage three: Amur, Malayan, and Sumatran. The Smithsonian's National Zoo and Conservation Biology Institute is home to Sumatran and Amur tigers; Sumatran tigers are (5) \_\_\_\_\_\_ as Critically Endangered on the International Union for Conservation of Nature's Red List, and Amur tigers have been classified as Endangered.

#### SubQuestion No: 45

#### Q.45 Select the most appropriate option to fill blank number 5.

- Ans X 1. Numerated
  - X 2. Detailed
  - 🗙 3. Recorded
  - 4. Listed

Question ID : 264330163393 Option 1 ID : 264330640854 Option 2 ID : 264330640853 Option 3 ID : 264330640851 Option 4 ID : 264330640852 Status : Answered Chosen Option : 4

#### Comprehension:

Read the given passage and answer the questions that follow.

What if globally designed products could radically change how we work, produce and consume? Several examples across continents show the way we are producing and consuming goods could be improved by relying on globally shared digital resources, such as design, knowledge and software.

Imagine a prosthetic hand designed by geographically dispersed communities of scientists, designers and enthusiasts in a collaborative manner via the web. All knowledge and software related to the hand is shared globally as a digital commons.

People from all over the world who are connected online and have access to local manufacturing machines (from 3D printing and CNC machines to low-tech crafts and tools) can, ideally with the help of an expert, manufacture a customised hand. This is the case of the Open Bionics project, which produces designs for robotic and bionic devices. There are no patent costs to pay for. Less transportation of materials is needed, since a considerable part of the manufacturing takes place locally; maintenance is easier, products are designed to last as long as possible, and costs are thus much lower.

# SubQuestion No : 46

# Q.46 Identify the most suitable title for the given passage.

- Ans 🛛 🗙 1. Knowledge Explosion
  - 🗙 2. Customised Hand
  - 🗙 3. Shared Information
  - 4. Digital Globalisation

Q.45 Study the given table and answer the question that follows.

The table shows the percentage population of four states below poverty line and proportion of male to female.

State	0	Proportion of	male to female
	population below		
	poverty line	Below poverty line	Above poverty line
		Male : Female	Male : Female
Р	28	3:2	7:3
Q	15	4:7	6:5
R	24	5:3	3:3
S	13	2:5	1:3

If the total population of state R is 26,000, then what is the number of females above poverty line in state R?

Ans 🗙 1. 9,780

- 2. 9,880 **(**
- 🗙 3. 9,560
- X 4. 9,950

Q.2 Study the given table and answer the question that follows. The table shows data of population and literacy/illiteracy rate among the population in three different villages.

Village	Respective ratio	Percentage of literates	Number of illiterates
, mage	between number of	(Males and females)	(Males and females)
	males and females	out of total population	out of total
			population
Р	2:5	45	380
Q	3:7	65	270
R	1:3	80	150

The number of illiterates in village R is what percentage less than that in village P?

Ans  

$$\times 1.60\frac{11}{19}\%$$
  
 $\times 2.60\frac{9}{19}\%$   
 $\checkmark 3.60\frac{10}{19}\%$   
 $\times 4.60\frac{8}{19}\%$

## Q.3 In a circle of radius 42 cm, an arc subtends an angle of 60° at the centre. Find the length of the arc.

(Take 
$$\pi = \frac{22}{7}$$
)  
Ans  $\checkmark$  1.44 cm  
 $\checkmark$  2.21 cm  
 $\checkmark$  3.22 cm

X 4. 42 cm

### Comprehension:

Read the given passage carefully and answer the questions that follow.

As the world's population approaches 8 billion and resource use intensifies, pollution is ever more extensive, pervasive, and persistent. It affects our health through the food we eat, the water we drink and the air we breathe. By 2025, the world's cities will produce 2.2 billion tonnes of waste every year, more than three times the amount produced in 2009. That said, pollution is not a new phenomenon and is largely controllable and often avoidable, as shown in some countries and cities that have succeeded in decoupling economic growth from pollution and waste accumulation.

With the end goal to eradicate all forms of pollution by 2030, the UN Environment Programme was tasked by the UN Environment Assembly to coordinate the implementation of a global plan reiterating that pollution is not only an environmental priority, it's a priority for the achievement of the Sustainable Development Goals.

# SubQuestion No : 46

Q.35 Study the given table and answer the question that follows.

The table shows the number of students studying in six different classes of six different schools.

School	Class V	Class VI	Class VII	Class VIII	Class IX	Class X
Р	152	160	145	156	147	144
Q	148	166	150	155	157	143
R	161	152	140	145	143	165
S	159	142	149	140	142	168
Т	147	144	158	163	154	150
U	150	160	162	160	161	140
Total	917	924	904	919	904	910

The number of students studying in class VII from school U is what percentage of the total number of students from all the classes together from that school (rounded off to 2 digits after decimal)?

Ans 🗙 1. 16.48%

🗙 2. 18.25%

🗙 3. 15.63%

🖋 4. 17.36%

Q.36 Study the following table carefully and answer the questions based on it.

The following table shows the domestic sales of vehicles of four manufacturers from 2010 to 2015.

Manufacturer	2010	2011	2012	2013	2014	2015
A	560000	580000	600000	620000	650000	680000
В	540000	590000	570000	630000	710000	550000
C	610000	580000	620000	680000	690000	630000
D	630000	570000	700000	690000	700000	640000

With respect to which of the following combinations, is the sales of vehicles lowest over the given period?

Ans 🗙 1. A, 2010

🗙 2. B, 2015

🖋 3. B, 2010

🗙 4. A, 2011

#### Comprehension:

Read the given passage carefully and answer the guestions that follow.

The rise of social media has undoubtedly changed the way we communicate with one another. It has connected people from all over the world and provided a platform for voices that were once silenced. However, as with any form of communication, social media has its downsides.

One of the most significant downsides is the spread of misinformation. With the rise of social media, anyone can become a content creator, which means that anyone can share information without fact-checking or considering the consequences. This has led to a proliferation of false information, from conspiracy theories to hoaxes, that can quickly spread and cause harm.

One recent example of this is the COVID-19 pandemic. Social media has played a significant role in the spread of misinformation about the virus and the vaccines. False claims about the safety and effectiveness of the vaccines have caused many people to be hesitant or outright refuse to get vaccinated. This, in turn, has led to the prolongation of the pandemic and the loss of many lives.

The spread of misinformation on social media is not a new phenomenon. In fact, it has been around for centuries. However, the speed and ease with which misinformation can spread on social media have made it a particularly pernicious problem in our modern world.

Throughout history, misinformation has been used to sow discord and manipulate people. For example, during World War II, the Nazi regime used propaganda to spread false information about Jews, Roma, and other targeted groups in order to justify their persecution and ultimately their extermination. Similarly, during the Cold War, both the United States and the

Soviet Union used propaganda to demonise one another and sway public opinion. The difference now is that social media has made it easier than ever to spread false information. A single post or tweet can reach millions of people within seconds, and it can be difficult to counteract the effects of that misinformation once it has spread.

So, what can we do about it? The answer is not simple, but it starts with education. We need to teach people how to think critically, how to fact-check, and how to discern between credible sources and fake news. We also need to hold social media companies accountable for the content on their platforms and ensure that they are doing their part to combat the spread of misinformation.

In short, the rise of social media has given us a powerful tool for communication, but we must use it wisely. We must be vigilant against the spread of misinformation and work together to ensure that the information we consume and share is accurate and reliable.

## SubQuestion No: 46

# Comprehension:

In the following passage some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank. Rabindranath Tagore founded a small school at Santiniketan in 1901 and Kala Bhavan, an art school, in 1919 which (1)\_\_\_\_\_\_ became a part of the Visvabharati University founded in 1921. Located in an (2)\_\_\_\_\_\_ village some distance from the city of Calcutta, Kala Bhavan presented an alternative methodology of art training, in which studio based practice was (3)\_\_\_\_\_\_ in favour of learning through observation and living as a part of nature. The natural surroundings with the (4)\_\_\_\_\_\_ of bare red earth dotted with trees, the colours of the changing seasons, the animals and birds (5)\_\_\_\_\_\_\_ inspiration to students.

#### SubQuestion No: 45

Q.45 Select the most appropriate option to fill in blank no. 5.

- Ans 🗙 1. groomed
  - 🗙 2. refused

🖋 3. provided

X 4. agreed

#### Comprehension:

Read the given passage carefully and answer the questions that follow.

Mountains occupy about a quarter of the Earth's land, harbour most of its biodiversity hotspots and supply fresh water to an estimated half of humanity. Present on every continent, mountains include a multitude of ecosystems holding many unique species such as snow leopards and mountain gorillas. They are also home to great cultural diversity among people adapted to the challenges of mountain life. Their special traditions and breath-taking scenery attract ever-growing numbers of tourists.

Mountain regions are particularly sensitive to degradation from both human pressures and climate change. Steep slopes mean the clearing of forest for farming, settlements or infrastructure can cause serious soil erosion as well as the loss of habitat. Erosion and pollution harm the quality of water flowing downstream. Climate change threatens the quantity and timing of water supplies to farms, cities, industry and power stations. Fast-rising temperatures are forcing mountain species, ecosystems and the people that depend on them to adapt or migrate.

## SubQuestion No : 46

Q.46 What is the ANTONYM for the word 'diversity' from the passage?

- Ans X 1. Block
  - 🗙 2. Dilemma
  - 3. Uniformity
  - X 4. Heritage

Mountain regions are particularly sensitive to degradation from both human pressures and climate change. Steep slopes mean the clearing of forest for farming, settlements or infrastructure can cause serious soil erosion as well as the loss of habitat. Erosion and pollution harm the quality of water flowing downstream. Climate change threatens the quantity and timing of water supplies to farms, cities, industry and power stations. Fast-rising temperatures are forcing mountain species, ecosystems and the people that depend on them to adapt or migrate.

## SubQuestion No : 50

#### Q.50 Which of the following most accurately states the central idea of the passage?

#### Ans X 1. Pollution

- 2. Mountain ecosystem
- X 3. Biodegradation
- 🗙 4. Climate change

Question ID : 264330164689 Option 1 ID : 264330645919 Option 2 ID : 264330645922 Option 3 ID : 264330645921 Option 4 ID : 264330645920 Status : Answered Chosen Option : 3
